PROFILE

I am a highly motivated and technically proficient entry-level software engineer with a Bachelor's Degree of Technology in Software Engineering from Harare Institute of Technology. With a strong foundation in SQL,Java,C# JavaScript, HTML, CSS, Python, and WordPress, I am well-equipped to tackle various challenges in software development

EDUCATION

BTECH IN SOFTWARE ENGINEERING (HIT)

July 2018 - May 2023

- ◆ Major in Software Development.
- ◆ Thesis involved production a smart social media management that can be used as an off the shelf program
- ◆ Certificate in Higher and Tertiary Education

EXPERIENCE

Southern Africa Association of Accountants (SAAA)

IT Support

September 2021 - May 2022

During my tenure at Southern Africa Association of Accountants (SAAA), I provided technical support to users, conducted hardware and software maintenance, managed network systems, and led training sessions on hardware, software, and network systems, including the SAAA student portal. I actively participated in designing the SAAA student portal with LADS Africa, conducted system and unit testing, documented processes, designed the SAAA website, participated in student exam invigilation, and assisted at the help- desk. This diverse range of responsibilities honed my problem-solving abilities and equipped me with a comprehensive understanding of IT support and system management. My proactive approach and dedication to excellence ensured smooth operations and user satisfaction throughout various projects and tasks

EXPERIENCE

Optar Technologies
IT Intern

December 2020 - April 2021

During my internship at Optar Technologies, I played a pivotal role in designing and developing websites, collaborating closely with clients and stakeholders to ascertain their requirements and objectives. I conducted thorough testing and debugging processes to ensure the functionality and efficiency of the websites. Additionally, I carried out routine website maintenance tasks to uphold optimal performance and user experience. This hands-on experience allowed me to refine my skills in web development and customer engagement, contributing to successful project outcomes and client satisfaction.
